

Economics

Crifo et al. (2017); Ostrom (1990)

$a = 4$	$b = 2$
$e = 10$	$N = 5$

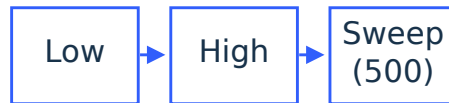

Free-rider dominant strategy

Priced into borrowing cost

Computation

Nash (1950)

Six-round decision engine

Verified against hand calculations

Behavioral Science

Andreoni & Petrie (2004); Fischbacher et al. (2001)

Image-concern vs. conditional cooperation

Discriminate via 2x2 design

Observability-Based Public Goods Game for Sovereign Disclosure

Genuine vs. performed transparency · Peer visibility effects

Dashed arrows = proposed synthesis of the cited foundations; the peer schedule is fixed and reproducible.
